3. Application

The SDI Output board can be connected to the MPEG Decoder's Transport Stream B Output (Connector 2 at the MPEG Decoder's datasheet). If embedded audio output is required, the MPEG Decoder's I²C Audio Output must be connected to the Digital Audio Input of the SDI Output board (Connector 4, Pins 9, 11, 13 and 15). Valid video and audio data received by the SDI Output board is signalled by LEDs a and d.
